Watch Officer's Guide: A Handbook For All Deck Watch Officers - Fifteenth Edition

Synopsis

Almost as essential to a successful bridge watch as a helm, this guide has long been a primary source of information for standing a taut, safe, and efficient watch. The new edition has been updated for the Navy of the twenty-first century, reflecting the need for increased security, the appropriate role of automation in navigation, and the extensive integration of computers into virtually every phase of watchstanding. While these new elements give this revised edition a futuristic feel, the timeless basics are reassuringly still there. New figures and appendixes reveal the evolving nature of today's Navy and the wonders of supportive technology, yet proper development of the human element remains paramount in this newest version of a longstanding classic. Admiral Stavridis and Captain Girrier have made the essential guide a worthy companion to their Division Officer's Guide, and they have ensured that this latest addition to the Blue & Gold Professional Library meets the exacting standards of that important series. Safe navigation, standard commands, honors and ceremonies, communications, weather, and practical advice on the keeping of a deck log are among the many subjects covered in this comprehensive book. Practical checklists and samples help watchstanders meet the demands of challenging evolutions such as getting underway, entering port, and night steaming. Whether the watch is on the bridge, on the quarterdeck, or in the combat information center, the prudent watchstander will do well to adhere to the advice of a famous ad campaign: "Don't leave home without it."

Worked as described

A year before I made Chief, I bought one of these. It was instrumental in preparing for the next step in my career. Since I retired in 1990 I lost track of the book and wanted another one. I don't know if it was for sentimental reasons or what. Just felt the need for it. Thanks, Ray, RMC(SW) USN Ret.

Great read for a new officer.

This book served me well as I was on the flight on my way to my first duty station. I was on submarines prior to this aircraft carrier tour and after reading, though many things are similar such as deck logs, I have a better understanding.
