Customer Reviews

Very much enjoyed the book. I was on the edge for a 4.5 stars, primarily for the reasons others have noted in other reviews. I enjoyed the multiple perspectives before in other books, alternating between Chris and Declan viewpoints. In this one though, it seemed more jarring at times. And for the criticism of more Mack than Declan at times, I have a feeling (based on some of the story hints) that Mack may end up bearing more importantly in the upcoming stories. Or I could just be flat wrong. Either way, good story and after reading it, it brought back enough good memories of the team that I went back and read a few more of the more recent books just to refresh my memory the different characters. I think if you like Conroe's world so far, then you will enjoy this book. Give it a shot.

Like all of the previous books, this one is excellent. I particularly like the closing down decrescendo at the end. It lets us all relax as the story comes to a close. As with previous reviews, however, I

really wish this author would get a copy editor who knew the difference between an opening single quote and a leading apostrophe, and when to use me, myself, or I. That is very distracting and makes the story difficult to read. Also, when used as the name of our planet, Earth is a proper noun and should be capitalized. As my third-grade teacher used to say, neatness counts. So, but for these issues, I would have given this book a rating of five stars.

Good addition in a good series. But not great. It moved along well but some of the main characters from the series got sidelined. The solution to the alien menace was a bit contrived, seemingly this was explained by magical "luck." But if we can use this to get out of situations we might as well just goof off and count on our luck saving us. I am unclear how the queens could plot with a dragon since they can't speak to one another. Declan not holding up his end of bargain with the land also seemed contrary to his character. Possibly you could read this as stand alone book but reading the series in order provides the greatest insight.

Mr. Conroe, I must give credit when it is DEFINITELY due. You see, I was in the Military, grew up in the Military world thanks to both my parents, Aunts, Uncles, Grandparents - basically it's a family thing. There were only a few areas that were - let's just say "tricked up" - but you have done your homework thoroughly with multi-national government response teams, tactics etc... But THE THING THAT (aside from the whole story from the first book to the 12th being AMAZING and UNIQUE), I THAT ONE SIDE OF MY FAMILY IS IRISH and the other is ITALIAN - leaving me 50/50 (don't let my name fool you - I'm married) My point though is both these cultures take our folklore VERY serious and once again you surprised me that you were incredibly detailed - there were phrases you used that literally brought me back to my childhood where, when the call of the Military actually allowed us all to get together and my Grandparents would tell us about our heritage. THANK YOU FOR GETTING IT RIGHT. *** SPOILER ALERT *** Aside from my personal reaction to these books due to what I explained, you brilliantly blended actually "known" expectations of some aspects or species, then flipped a few to a different imagery, wrapped in today's culture with the old, plugged in the alphabet soup of government agencies, and also threw in half a dozen religions! Oh, and of course found more worlds you Sir have a GIFT OF YOUR OWN. I am looking forward to reading your next book (or how many more you would like to - I am hoping that you have continued success and happiness in writing, because quite frankly I am very tired of other authors that have left millions of us hanging from some lame excuse or another - and I am willing to bet you are NOT like them at all) I AM ALSO IN AGREEMENT - VAMPIRES SHOULD NOT SPARKLE!

Its the Demon Accords series not that there is much demon in this book but still the great characters and storyline. I of course jump on the books in this series as soon as available. In fact read this one twice because I read it the first time in two days. Definitely looking forward to the next book. If you are this far in the series why would you stop! An even better plus the story and quality of writing has stayed top notch, very consistent.

I seriously love these books. I like how the good guys keep increasing their powers, but then have to face more powerful bad guys, and the bad guys aren't Dragonball Z esque, in the sense that they don't fight the most powerful being in the universe only to fight the REAL most powerful being next book, and then once defeated find out that this most powerful being isn't at his full strength he needs to power up which he conveniently does several times while the fight commences. No these books set up villains that feel organic and believable.

As per usual, John Conroe delivers with his newest Demons Accords book. There's a nice balance of action, suspense and intrigue and the pacing is spot on. The story never gets boring and it's hard to find a good point to put the book down (it's easier to just set aside a day and read the entire book in one sitting). New, more powerful enemies (and some potential allies) are revealed which test the team's abilities and heightens the tension in the story. There's a new viewpoint from a familiar character which helps flesh out more about the major characters, helping to show how the major characters are seen by others. The new viewpoint also helps to shed more light on the character themselves and their motivations. The character building is brilliant as always with believable motivations and reactions. The new setting is also dealt with very well, tying in elements from different mythological sources in a clever way. I'm looking forward to the next release and a continuation of the story.
