Balancing Chemical Equations Worksheets (Over 200 Reactions To Balance): Chemistry Essentials Practice Workbook With Answers

Synopsis

Master the art of balancing chemical reactions through examples and practice: 10 examples are fully solved step-by-step with explanations to serve as a guide. Over 200 chemical equations provide ample practice. Exercises start out easy and grow progressively more challenging and involved. Answers to every problem are tabulated at the back of the book. A chapter of pre-balancing exercises helps develop essential counting skills. Opening chapter reviews pertinent concepts and ideas. Not just for students: Anyone who enjoys math and science puzzles can enjoy the challenge of balancing these chemical reactions.

Customer Reviews

My 12 year old has started this book and was able to understand the basics of balancing the equation in no time. The book covers 200 equations that are all that are tested in high school. So in brief you can't go wrong with this product.

There are one or two equations per sheet. It would be quicker to write your own....

It is a great learning tool!

Excellent

Thank you very much

It was what i requested.

Please order if you are having trouble with equations.

Great book for practicing balancing chemical equations. The book starts with a brief explanation of the various aspects of balancing chemical equations. The book is then dividing into chapters (question banks) of increasing complex balancing problems. Answers to all the questions are in the back. This book will be a great resource for any high school chemistry student you need a bit of practice balancing chemical equations. If I were to recommend a way to improve the next version of the book, I would recommend adding additional explanations for several of the problems in each chapter. My legal disclaimer: I won this book via a goodreads.com give away
