Forex Range Trading With Price Action - Forex Trading System

Synopsis

Forex Range Trading With Price Action Lucrative price action range trading system with 95% rate of success Timeframes - 1 hours and 4 hours If you trade with the trend like the majority of traders out there, then you probably know by now that following the trend and jumping in the market when a good opportunity shows itself represents the safest and most lucrative approach a trader can have if he wants to be successful. However, most of the times, a problem appears when the trend pauses and the market starts to move sideways, causing so many trend following traders to lose most or all of their previous hard earned profits. This book presents a complete forex trading system for trading a range bound market. It goes from explaining how to spot in time that price is about to develop a trading range, to managing your stop loss levels and exiting the trade. This is all done just by reading the price action, this system does not include any technical indicators. You will learn how to recognize early the shift from trending to sideways movement that will keep you away from losing trades. You will learn how to identify a range early and trade it successfully, with clear entry, stop loss, exit levels and with very good risk reward ratio.

Customer Reviews

Ok, well this is Mr. Damir's latest book and has been very helpful to me. His other books emphasize trend trading, which many great traders abide by and has attributed to their amazing success (i.e. Richard Dennis, Louis Bacon, Jerry Parker, etc). Mr. Damir does a fantastic job of teaching someone how to profit in trend environments in his previous books and I highly encourage anyone who wants to become a better trader to pick one up! Ok, so what if there is no trend? That is what this book is perfect for! Trading a range when no trend is present. Why sit on the sidelines and wait for a trend when you can range trade and make some serious pips! Mr. Damir uses many clear, concise, step by step examples and many illustrations from currency pair charts. This makes learning the material very concrete and easy! A must have!

Hi Sir Damir, I am new to forex trading and have been learning the past 2 months - reading books, looking at charts, listening to trading podcasts (I hope Chat with Traders would interview you someday) and youtube, doing the demo accounts, etc. Though I could say that have learned so much in the past couple of months, I could say I've learned so much more the past few days reading your books. I stumbled on your "50 Pips a Day" strategy kindle book and found it to be very logical. So I bought your books one by one and read it, until I ended up buying and reading all of it in a span of 3 days. Each time I read a book, I discover something new and not just a concept but the whole strategy itself. I've heard one trader from a podcast who once said "there is always something happening in the market", and in deed it is true. But the thing is most do not know how to take advantage of what is happening. With all those strategies at my disposal, I think I could trade at all types of market (trending or ranging) and at high and low time frames and approach it at different angles. I'm currently in the process of back testing the strategies this week. Thank you!!!! Happy New Year!!!!

Great Forex Trading book! Laurentiu shares his views in trading the fx range market with valuable points and steps. Even though English is his second or third language, the writing is very easy to understand. Language is only a tool, the content of the book is what I am looking for.

Another great addition to the authors previous ebooks. I literally made the cost back using this setup before I finished reading the entire book. I have been up and down (mostly down lol) in my trading since I started trading, trying different methods or my own and overall failing. I especially like the lack of indicators used in his books. Before I continue rambling I'll stop here and just say thanks for the entire collection, wish I had them a long time ago. Is there any talk of a hard copy compilation?

As a novice to forex trading I have opted to read all of Laurentiu's books in preparation of trading. Each book delivers a clear and concise strategy, and forex graphs now have meaning for me. Laurentiu also gives sound money management advice. Start with the 50 pips a day book and move forward from there in no particular order. Each book feels like a new secret is being revealed, and collectively you have strategies to trade with the trend, trend reversals and range trade on short and longer time frames. I am not yet trading live, but research into past price action reveals that these strategies look to work well.

Buy all of his books, but this is the book that I come back to the most. Because the markets are ranging.....price moving horizontally...much of the time, this book provides a system where you can find setups to trade often.

I have now purchased 4 of Laurentiu's ebooks and found I have learnt valuable insights each time. The format of going through his process and creating an understanding makes these books very readable, and the summary steps at the end provide great reminders and allow for an easy implementation of the systems and information he has presented. Additionally, in corresponding with him he was quick to respond and answer points of clarification I had. Highly recommended. regards Jamie

My third book by Laurentiu; what a gem; short, powerful, no long stories and explanations as to how to make the first million.....no lies, and no bs; just simply straight to the point how to successfully trade. Should cost at least 149\$ in my opinion.....why searching the internet for years for the right holy grail system....(like me) and spend your last savings on the last robot, if you can invest in all of his books. You can't afford NOT to!!
