Sudan (Bradt Travel Guides)

Synopsis

â ¢The only guide dedicated solely to the new Republic of the Sudanâ ¢Explore entire pyramids and other ancient sites entirely free of tourist crowdsâ ¢Drink in views over the Sudanese plains from the granite Taka Mountainsâ ¢Dive the reef where Jacques Cousteau conducted his experiment in underwater living â ¢Experience Sudanâ ™s cultural diversity among the 50 tribes of the Nuba Mountainsâ ¢Read advice on where to stay/eat, travelling safely and cultural etiquetteAs a staple of bleak news headlines, Sudan has been slow to make its abundant attractions known to the outside world. Few foreigners have heard of the Kingdom of Kush, walked among the isolated pyramids of MeroÃ« or witnessed the whirling dervishes of Omdurman. Yet those who do make it here are invariably enchanted by its easy-going nature, fascinating history and the warm welcome they receive from the Sudanese people.This, the only stand-alone guide to post-partition Sudan, leads you expertly from the labyrinthine souks of Khartoum to coral-bedecked wrecks off the Red Sea coast. Whether youâ ™re rushing through on the trans-Africa trail or whiling away weeks among rich archaeological sites, this fully revised third edition is your indispensable companion.

Customer Reviews

Plenty of good background info but some details have changed since publication. Will get you round

the country OK. As usual with Bradt the street plans are poor and not as easy to use as lonely planet.

Item was as described.

Has good detail and was helpful covering a country without much available in print

It is so hard to find information on this turbulent area of the world that this is wonderful. Bradt is a known name in travel guides and my library is happy to have this book.

This is one of the worst and most incorrect travel books that is available about any country and that I encountered in decades of travelling and living in many countries around the globe. Too much 'information' is so wrong that it sometimes is even dangerous to rely on it, particularly in a country like Sudan. Where there is an established bridge the authors make you believe that one must take a ferry. Apparently not too much has been corrected or even newly researched for this third edition, when one compares it to edition 1 of a few years back. Information regarding how to reach sites frequently is so imprecise or missing at all that hardly anybody is ever able to locate a number of sites, instead the 'new' authors rely on taking a local ricksha or donkey cart to get you there. Certainly no traveller with his own vehicle will ever be able to locate a number of localities. Even some of the very few given GPS coordinates are not accurate. Several interesting locations are not mentioned at all. Road or track conditions are at times wrong or missing at all. Important accommodation facilities are unknown to that 'guide', which is inexcusable as Sudan doesn't have many possibilities anyway. Prices can't always be correct, so this is not criticised. It appears that the new authors probably have visited the museum in Khartoum and otherwise were quickly, if at all, driven by some sort of guide to a few common places only, without grasping very much of what goes on and where they really are. Save your money or at least be very careful when using that 'travel guide'. Regrettably there are not many choices, or no other choices, when it comes to Sudan. A traveller to Sudan most probably has more adventurous and explorative characteristics than usual and therefore should be prepared better to 'handle' that book, hopefully. Background: I live in Sudan and have just finished another 4-week self-drive tour with my own 4x4 across all of Sudan, including severe desert crossings and to a number of places and regions that are not even mentioned in that book. It would have been quite hair-raising and at times dangerous having had to rely on that book, although each and every part of that 'guide' was studied and verified when travelling and

exploring. Note: that 4-week tour was done alone with my wife, no guide whatsoever, no other vehicle, and no guidance whatsoever from anybody or any tour operator and it was wonderful.

This guide book is poorly written. Most of the information is outdated before it was even published due to the rapidly changing situation in South Sudan and the present civil war. It is obvious that much of the information was obtained 2nd or even 3rd hand. Do not waste your money buying this book. I work in South Sudan and know this book will be of little value to the visitor to South Sudan.

I felt it was not well researched and thin on info, thus disappointed. Both the Sudans should have been included.-I've lost my enthusiasm for Bradt and cancelled my South Sudan order
