Dentofacial Deformities: Integrated Orthodontic And Surgical Correction, Volume III

Synopsis

In an organized, comprehensive, user-friendly style, this text presents state-of-the-art advances in orthodontics and surgical instrumentation, techniques, and adjunctive cosmetic procedures. It features coverage of conditions common to Class I, II, and III deformities, secondary cleft lip and palate dentofacial deformities, and nasal deformities associated with dentofacial deformities. Most of the chapters cover three major areas: most common orthodontic and surgical treatment of the deformity, adjunctive surgical techniques frequently helpful when added to the common techniques, and alternate treatment approaches describing treatment of less common variations of the deformity. * Unique step-by-step approach to presurgical orthodontic treatment, immediate presurgical planning, surgical techniques, and postsurgical orthodontic treatment. * Takes the reader through the entire process from diagnosis of the deformity to postsurgical assessment of the correction. * Provides a detailed discussion of diagnosis and treatment planning of transverse discrepancies in the maxilla and mandible. * User-friendly appendix on facial skeleton growth includes methods of applying growth prediction and treatment planning to patient care. * Organized for quick and easy referral to practical information useful in clinical practice. * Focuses on patient assessment and awareness of psychological needs to encourage consideration of whole patient in treatment of deformities. * Depicts cosmetic procedures used to refine the esthetic results following orthognathic surgery, showing how to achieve overall improved patient results and satisfaction.

Book Information

Series: Dentofacial Deformities (Book 3)

Hardcover: 656 pages

Publisher: Mosby; 2 edition (January 15, 1998)

Language: English

ISBN-10: 0815131291

ISBN-13: 978-0815131298

Product Dimensions: 1.2 x 9 x 11.5 inches

Shipping Weight: 4.4 pounds

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #2,536,545 in Books (See Top 100 in Books) #81 in Books > Textbooks > Medicine & Health Sciences > Dentistry > Orthodontics #126 in Books > Textbooks > Medicine & Health Sciences > Dentistry > Oral Surgery #152 in Books > Medical Books > Dentistry > Orthodontics

Customer Reviews

Encyclopedia for treatment of dentofacial deformities, in 4 volumes, written by Bruce N. Epker, John P. Stella and Leward C. Fish. Very clear and useful. For each clinical situation, a usual and an alternative orthodontic-surgical approaches, step by step, with :-details of treatment-presurgical orthodontic treatment-immediate presurgical planning (cephalometric prediction planning, model surgery and splint construction)-Orthognathic reconstructive surgery-Postsurgical orthodontic surgery treatment-factors affecting stability of treatment. Contains : Volume II- Evaluation and treatment planning-1- Systematic patient evaluation-2- Essentials of treatment planning-3- The patient consultations-4- Treatment considerations and monitoring common to all dentofacial deformity patients-5- Etiology, identification, and management of complications II- Class II dentofacial deformities-6- Class II dentofacial deformities secondary to mandibular deficiency-7- Class II dentofacial deformities secondary to vertical maxillary excess-8- Class II dentofacial deformities secondary to vertical maxillary excess and mandibular deficiency-9- Class II dentofacial deformities with open bite Volume III- Class III dentofacial deformities-10- Class III dentofacial deformities secondary to mandibular prognathism-11- Class III dentofacial deformities secondary to maxillary deficiency-12- Class III dentofacial deformities secondary to maxillary deficiency and mandibular prognathism-13- Class III dentofacial deformities with open bite-14- True midface dentofacial deformities IV- Class I dentofacial deformities-15- Class I vertical maxillary excess-16- Class I vertical maxillary excess with open bite Volume IV- Conditions common to class I, II, and III deformities-17- Transverse maxillo-mandibular discrepancies-18- Bimaxillary protrusion VI- Secondary cleft lip and palate dentofacial deformities-19- Alveolar-anterior maxillary bone reconstruction-20- Dentofacial deformities associated with cleft lip and palate VII- Nasal deformities associated with dentofacial deformities-21- Management of nasal deformities in patients with dentofacial deformities VIII- Autogenous tissue harvesting techniques-22- Autogenous bone harvesting techniques-23- Autogenous soft-tissue harvesting techniques Appendix- Normal facial growth Volume IV IX- Asymmetric dentofacial deformities-24- Diagnosis and treatment planning for correction of asymmetric dentofacial deformities-25- The asymmetric class II dentofacial deformities-26- Hemifacial microsomia and similar unilateral agenesis syndromes-27- The asymmetric class III dentofacial deformities-28- Unilateral hyperplastic conditions of the mandible and mandibular condyle X- Temporomandibular joint pathology associated with dentofacial deformities-29- Management of temporomandibular joint pathology in patients with dentofacial deformities XI- Distraction osteogenesis in treatment of dentofacial deformities-30- Distraction osteogenesis-Historical and biological perspectives-31- Distraction osteogenesis-Clinical

applicationsXII- Osseointegrated implants in treatment of dentofacial deformities-32- Implants for orthodontic anchorage and dentofacial development-33- Osseointegrated implants to aid in facial prosthetic rehabilitationXIII- Syndromes associated with dentofacial deformities-34- Methodological approach for syndrome identification in patients with dentofacial deformities-35- Specific syndromes associated with dentofacial deformities
