My 9 year old really enjoyed reading this book. In fact, especially because you can choose your own venture, he has read it several times. My younger child and I have been taking turns with big brother to read it, as well. It had been hard to successfully motivate my kids to continue reading during the summer break from school! After exhausting our choices at our small town public library, my eldest decided to re-re-read his Captain Underpants collection, but I really wanted him to read something new. We had never watched or heard of this apparent show on Disney Channel, but somehow I came across this book, and even better it has multiple paths the reader can take so that they really are reading something new, each time! My son would not stop talking about this book; he could not wait to tell us about the different paths he would take. Many times he would tell us he failed "the mission", but you simply go back to the chapter you came from and take the other path. One downside: My son had to use two bookmarks to keep track, one to mark the current page, but another to mark the last chapter he came from, in case he did "fail," because each venture you choose has you skipping around the entire book so it can be hard to remember which page you came from. It's appears to be in random order, you'll be reading from the back of the book, then back to the front, then the middle, etc. Some ventures are barely two pages and then it has you skipping to another place in the book, but my son seemed to enjoy this. I love that my child loves this book and also that the content is kid friendly. I love that they did included some color pictures in the story along with two small posters in the back of the book, as well. I purchased the hardback cover and was very impressed with the quality. I had to finally tell my son to STOP reading, and go to sleep!

Okay, so I'm an adult and this is a kids' book, but like the show it's based on, it combines what the show itself once called "a strong mystery element with humor that goes right over the heads of kids." Not dirty, mind you, but clever. It does a nice job of capturing the feel of the characters. I have to admit, though, that I don't have a great deal of patience with the flipping-around part of "Choose Your Adventure" books, so I read this straight through, the worst way to do it. That did give me an appreciation for authorial ingenuity, though!

My son loved this series and got it yesterday and loved it!

I read this with my 9-year old nephew and i think it is perfect for the 8-12 agr group. Not too difficult

to understand but not too childish either.

We bought this as a birthday gift for our 8 year old and she loved it! She fell in love with gravity falls so it was perfect!

Unfortunately I had to return since the kids already had it, from of course. But they love the book.

Nice book in the world of Gravity Falls, wish there were more like this

Daughter loved it! Was on time and as described.
