Conservation Of Neotropical Forests

Synopsis

The destruction of tropical forests is intimately intertwined with the fate of the rural poor who rely on this resource for their livelihood. Conservation of Neotropical Forests provides important information for understanding the interactions of forest peoples and forest resources in the lowland tropics of Central and South America. This interdisciplinary study features experts from both the natural and social sciences to illuminate the present dilemma of conserving neotropical resources. These contributorsâ •who are responsible for some of the most promising work in cultural and biodiversity conservationâ •investigate the patterns of traditional resource use, evaluate the strengths and weaknesses of existing research, and explore innovative directions for furthering the interdisciplinary conservationist agenda.

Book Information

Series: Biology and Resource Management Series

Paperback: 475 pages

Publisher: Columbia University Press (October 15, 1999)

Language: English

ISBN-10: 0231076037

ISBN-13: 978-0231076036

Product Dimensions: 6 x 1.1 x 9 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Customer Reviews

"Successfully bridges the gap between conservationists, anthropologists, and economists. Though it deals specifically with neotropical forests, it is essential reading for anyone involved in conservation of forests and their inhabitants, human or non-human, in all parts of the globe." -- "The Environmentalist"

Experts from both the natural and social sciences provide vital information for understanding the interactions of forest peoples and forest resources in the lowland tropics of Central and South

America. They investigate patterns of traditional resource use, evaluate existing research, and explore new directions for furthering the conservationist agenda.
