PRENTICE HALL BIOLOGY VIRTUAL LABS 2004C

Synopsis

The most respected and accomplished authorship team in high school biology, Ken Miller and Joe Levine are real scientists and educators who have dedicated their lives to scientific literacy. Their experience, knowledge, and insight guided them in creating this breakaway biology program -- one that continues to set the standard for clear, accessible writing. Brand-new content includes the latest scholarship on high-interest topics like stem cells, genetically modified foods, and antibiotics in animals.

Customer Reviews

After I ordered this CD- which was listed in 'okay condition'- I opened the package to find a brand new CD, not a scratch in sight. Great quality, will definitely be ordering again.

Good Condition.

clean, fast shipping

The real deal.

As promised

The book and CD arrived at the specified date, were well packaged and was not damaged in

shipment. It will be used by a senior high school student in Ghana, West Africa and he has received the book - their school year just started. He is very happy with the book and CD as he was able to use it directly on his home computer and has already performed 2 experiments. He knows that it will be very useful for him during his next 2 years of school. Thank you for your help as these books are needed but not available for sale in Ghana. If anything more is needed, I will know where to look for the item. Thank you again.

Great software for practicing bio labs in a virtual space. No mess, no fuss and can redo it over and over again. You can print out worksheets and graph results too. The labs have answers too - but little detailed explanations. The CD covers the labs required by AP biology.

Somewhat useful but the graphics are no longer state of the art. The product arrived on time
